ADDENDUM REPORT – PRE-ACCIDENT VALUATION

RE: Road Traffic Accident – Mr Esran Mohamednour – 12/10/2025

Dear Sirs,

We refer to our Contract Repair Report dated 17th October 2025 in relation to the above-captioned matter, and to the Defendant insurer's challenge to the pre-accident valuation set out therein. We have been asked to provide a further commentary in support of our valuation methodology and the figure adopted. This addendum is to be read alongside our original report and supersedes nothing contained within it.

SUMMARY OF THE VALUATION IN DISPUTE

Make / Model	HYUNDAI i10 Premium SE Auto
Registration	SJ67COU
Date of First Registration	2nd September 2017
Mileage at Loss	23,000 miles
Condition	Good
Cazana Retail Value	£10,788.00
Less 20% (Previous Total Loss)	£2,157.60
Engineer's Pre-Accident Value	£8,630.00

The figure of £8,630.00 represents our considered pre-accident valuation, arrived at by taking the established Cazana retail figure of £10,788.00 and applying a 20% downward adjustment to reflect the vehicle's previous total loss history. We continue to support that figure for the reasons set out below.

VALUATION METHODOLOGY

It is well established practice within the motor engineering profession, and consistent with the approach taken by the courts in claims of this nature, that the appropriate measure of pre-accident value is the retail price the Claimant would have had to pay to replace the vehicle with a like-for-

like example in the same condition, of the same age, mileage and specification, on the open market at the date of loss. We have proceeded on that basis throughout.

In arriving at our retail figure of £10,788.00, we have relied upon Cazana, an industry-recognised valuation provider whose data is drawn from a live sample of 327 comparable vehicles in the open market at the date of valuation. Cazana is widely used within the motor engineering profession and its figures are routinely accepted by insurers and the courts as reliable evidence of market value, being based on real-time advertised prices of comparable vehicles rather than historic guide pricing.

We have not relied upon a single source. The valuation has been triangulated against a separate body of contemporaneous market evidence drawn from Autotrader, the United Kingdom's largest motor classified platform, the results of which are set out below.

INDEPENDENT MARKET EVIDENCE – AUTOTRADER

An Autotrader search was conducted using parameters tightly matched to the subject vehicle: Hyundai i10, Premium specification, petrol, automatic, 5-door, registered 2017–2018, mileage band 10,000–25,000. That search returned nine live retail listings. The most directly comparable examples are reproduced below:

VRM	Year	Mileage	Trim	Seller	Asking Price
HN17ZPM	2017	23,000	Premium SE Auto	Independent	£10,750
LL67ADA	2017	12,276	Premium SE Auto	Trade	£11,600
YL17MKD	2017	18,957	Premium SE Auto	Trade	£10,388
(Bristol)*	2017	13,605	Premium SE Auto	Trade	£11,495
GY17OZJ	2017	16,000	Premium SE	Independent	£10,595
HF67KKV	2017	6,620	Premium SE	Franchise	£12,850

** VRM not legible from photograph; listing identified by dealer location (Bristol).*

The most compelling single piece of evidence is HN17ZPM, an exact like-for-like comparator: 2017, Premium SE Auto, 23,000 miles – identical age, identical trim, identical mileage – advertised at £10,750. That figure sits within £38 of our adopted retail value and corroborates it almost precisely. This vehicle appears in both the Cazana sample and independently in the Autotrader market search, providing dual-source confirmation.

Across the four Premium SE Auto comparators currently in the market, the average asking price is £11,058. The retail figure adopted (£10,788) falls beneath that average and cannot, on any reasonable view, be characterised as inflated.

THE PREMIUM SE TRIM IS A MATERIAL FACTOR

It is important that the Court is aware of the distinction between the standard Premium and the higher Premium SE specification, as this point is frequently overlooked when insurers rely on generic valuation guides. The subject vehicle is a Premium SE, which carries a number of factory-fitted features over and above the standard Premium, including:

- Satellite navigation with Mapcare and Live Services

- Heated front seats and heated steering wheel
- Front fog lights and front static cornering lights
- Rear parking sensors
- Privacy glass
- Climate control

The market evidence demonstrates that Premium SE examples consistently command a meaningful uplift over standard Premium cars at comparable mileage. If anything, our retail figure errs on the conservative side once that uplift is properly accounted for.

VEHICLE HISTORY AND CONDITION

The vehicle's MOT history, as set out in the Cazana Companion Report, is consistent with the recorded mileage at the date of loss. The most recent MOT (1st September 2025) was passed at 22,562 miles, against 23,000 miles at the date of loss – a logical and consistent progression. The advisories raised at that test (front brake disc wear and a minor oil leak, neither serious) are typical for a vehicle of this age and do not justify any departure from the "Good" condition rating applied. Earlier MOT history shows a single failure in August 2021 in respect of steering rack gaiters, which was rectified the same day. There is nothing in the vehicle's history that would warrant a further deduction.

THE 20% ADJUSTMENT FOR PREVIOUS TOTAL LOSS

We have not ignored the vehicle's previous total loss history. A 20% downward adjustment has been applied to the Cazana retail figure, reducing it from £10,788.00 to £8,630.00, to reflect the diminution in market value attributable to that history. This is a conventional adjustment, well within the range customarily applied by the profession, and is the same adjustment that an insurer settling a comparable claim would be expected to apply. The Defendant cannot, with any consistency, both demand recognition of the previous total loss history (which we have given) and at the same time challenge the underlying retail value from which that adjustment is calculated.

RESPONSE TO THE DEFENDANT'S POSITION

We are aware that the Defendant insurer disputes the retail value adopted. We have re-examined the available evidence and find no proper basis for that challenge:

- The retail figure of £10,788 is supported by a 327-vehicle Cazana sample at the date of valuation.
- It is independently corroborated by a contemporaneous Autotrader search returning 9 live listings.
- It is confirmed almost to the pound by an exact like-for-like comparator (HN17ZPM, £10,750).
- It sits below the average asking price for Premium SE Auto comparators in the market (£11,058).
- A 20% deduction has already been made for the previous total loss history.

In the absence of any market evidence put forward by the Defendant insurer that contradicts the figures above, we see no proper basis upon which to revise our pre-accident valuation

downwards. To do so would, in our professional view, be to undervalue the Claimant's loss and would not reflect the true cost of replacing the vehicle on the open market at the date of loss.

CONCLUSION

Our pre-accident valuation of £8,630.00 is reasonable, evidence-based, and properly supported by both industry-standard valuation tools and independent contemporaneous market data. The retail starting point of £10,788.00 is well within the range of asking prices for like-for-like vehicles, the 20% adjustment for previous total loss history is conventional and properly applied, and the resulting figure represents a fair and accurate reflection of the Claimant's loss. We respectfully invite the Court to accept our valuation.

We trust the foregoing assists the Court. We remain available to provide any further clarification that may be required, subject to Civil Procedure Rule 35.6.

STATEMENT OF TRUTH

I declare that I understand my duty in providing this report to the Court and I confirm that I have complied with that duty. I understand that this duty overrides any other obligation. The opinions expressed in this addendum represent my true and complete professional opinion on the matters to which they refer. The facts stated in this report are true to the best of my knowledge and belief.
